

# TO-DO APPLICATION

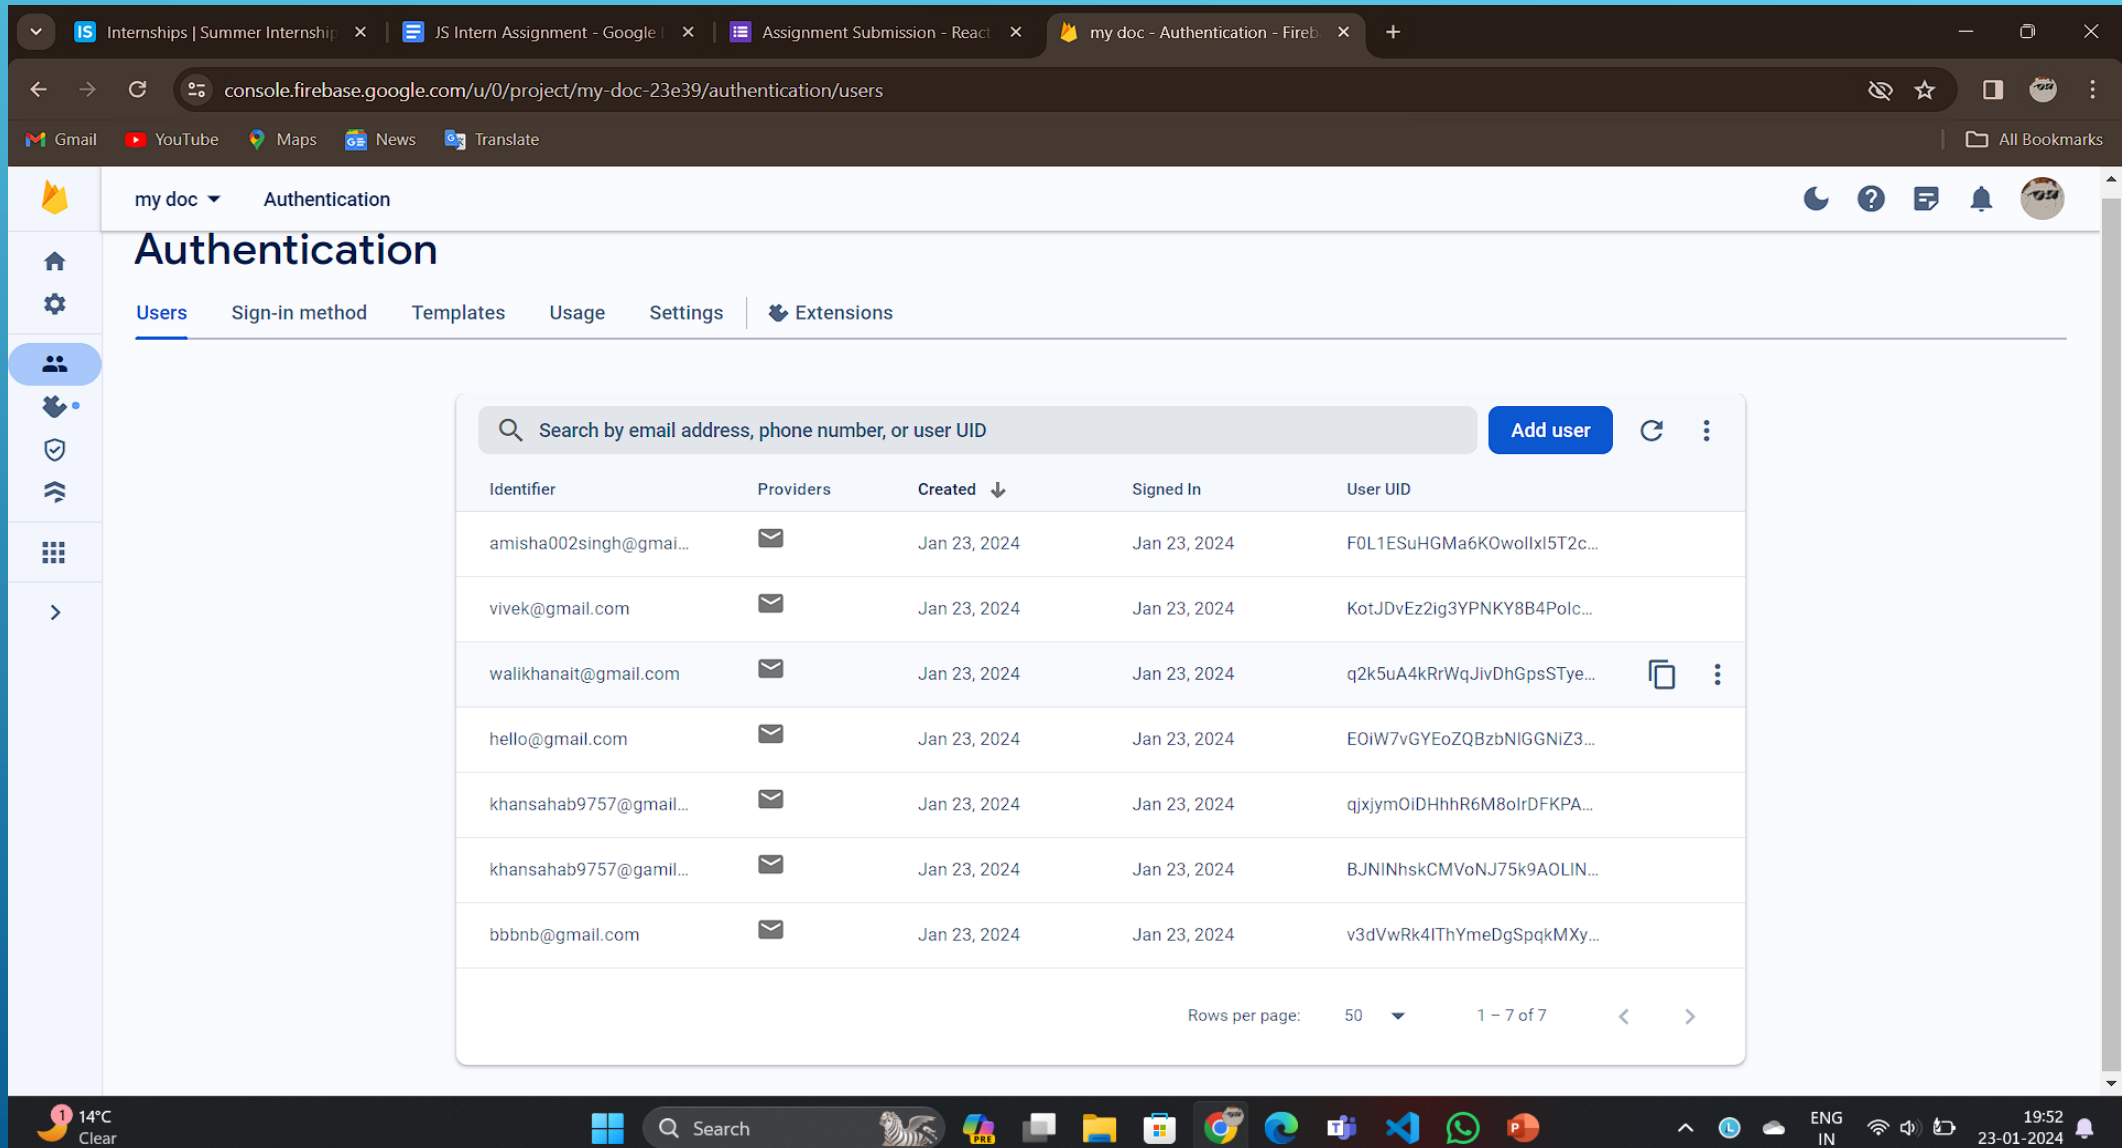

- Has user registration and Authentication.
- Task can be created and Managed.
- User interface is responsive.

Created BY:  
Amisha Kumari Singh

At first user have to register with username , email and password ..Then click to register.

Registered Id will be stored in the firebase .  
Here is some examples of some demo registered users.

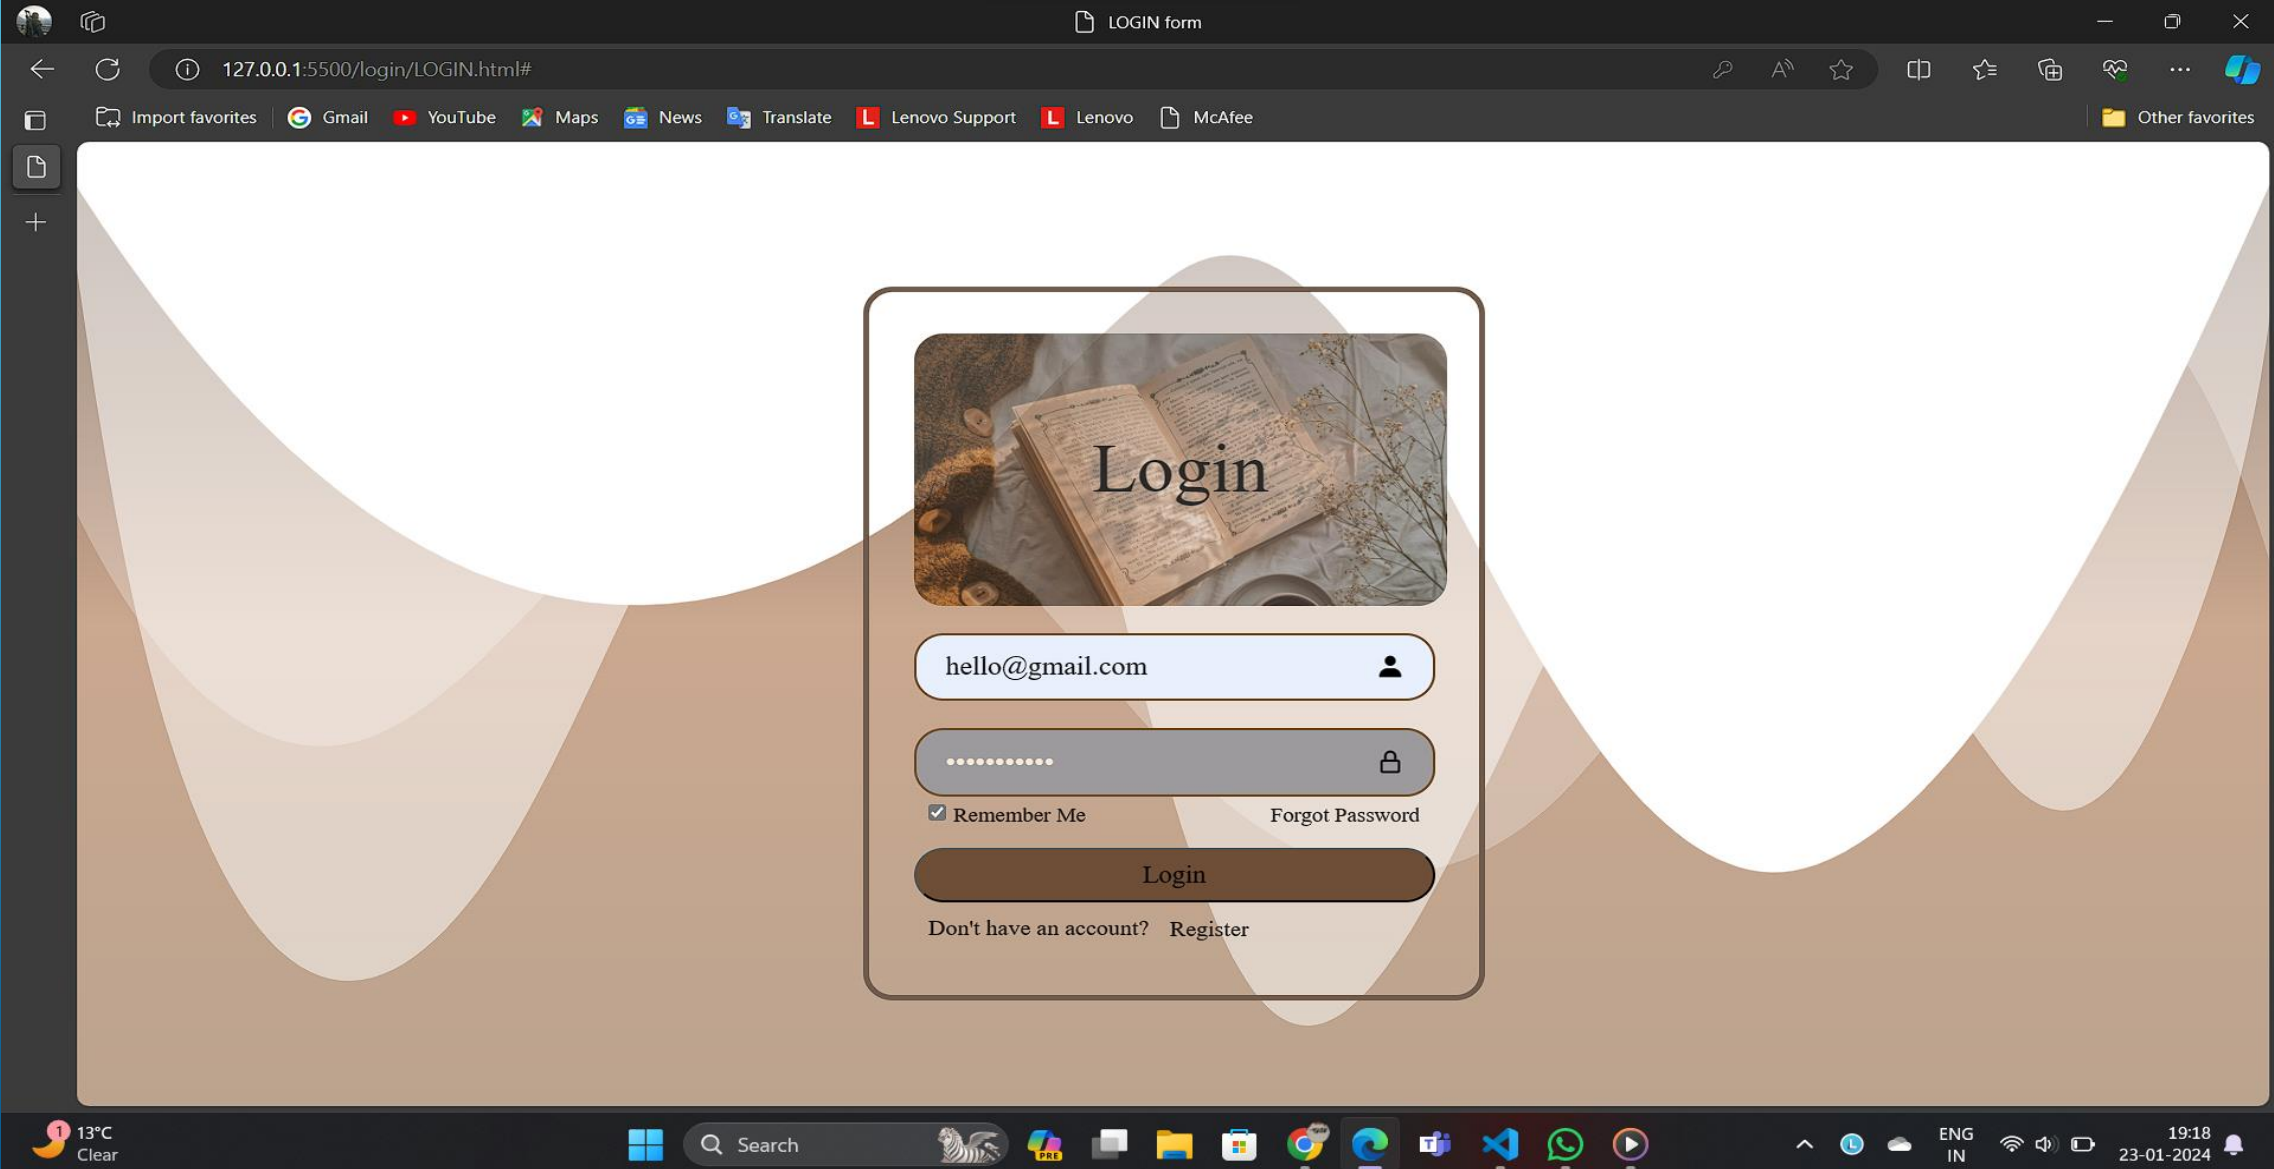

The screenshot displays the Firebase Authentication console for a project named 'my doc'. The 'Users' tab is selected, showing a list of registered users. The table includes columns for Identifier, Providers, Created, Signed In, and User UID. There are 7 users listed, all created on Jan 23, 2024. The interface includes a search bar, an 'Add user' button, and pagination controls at the bottom of the table.

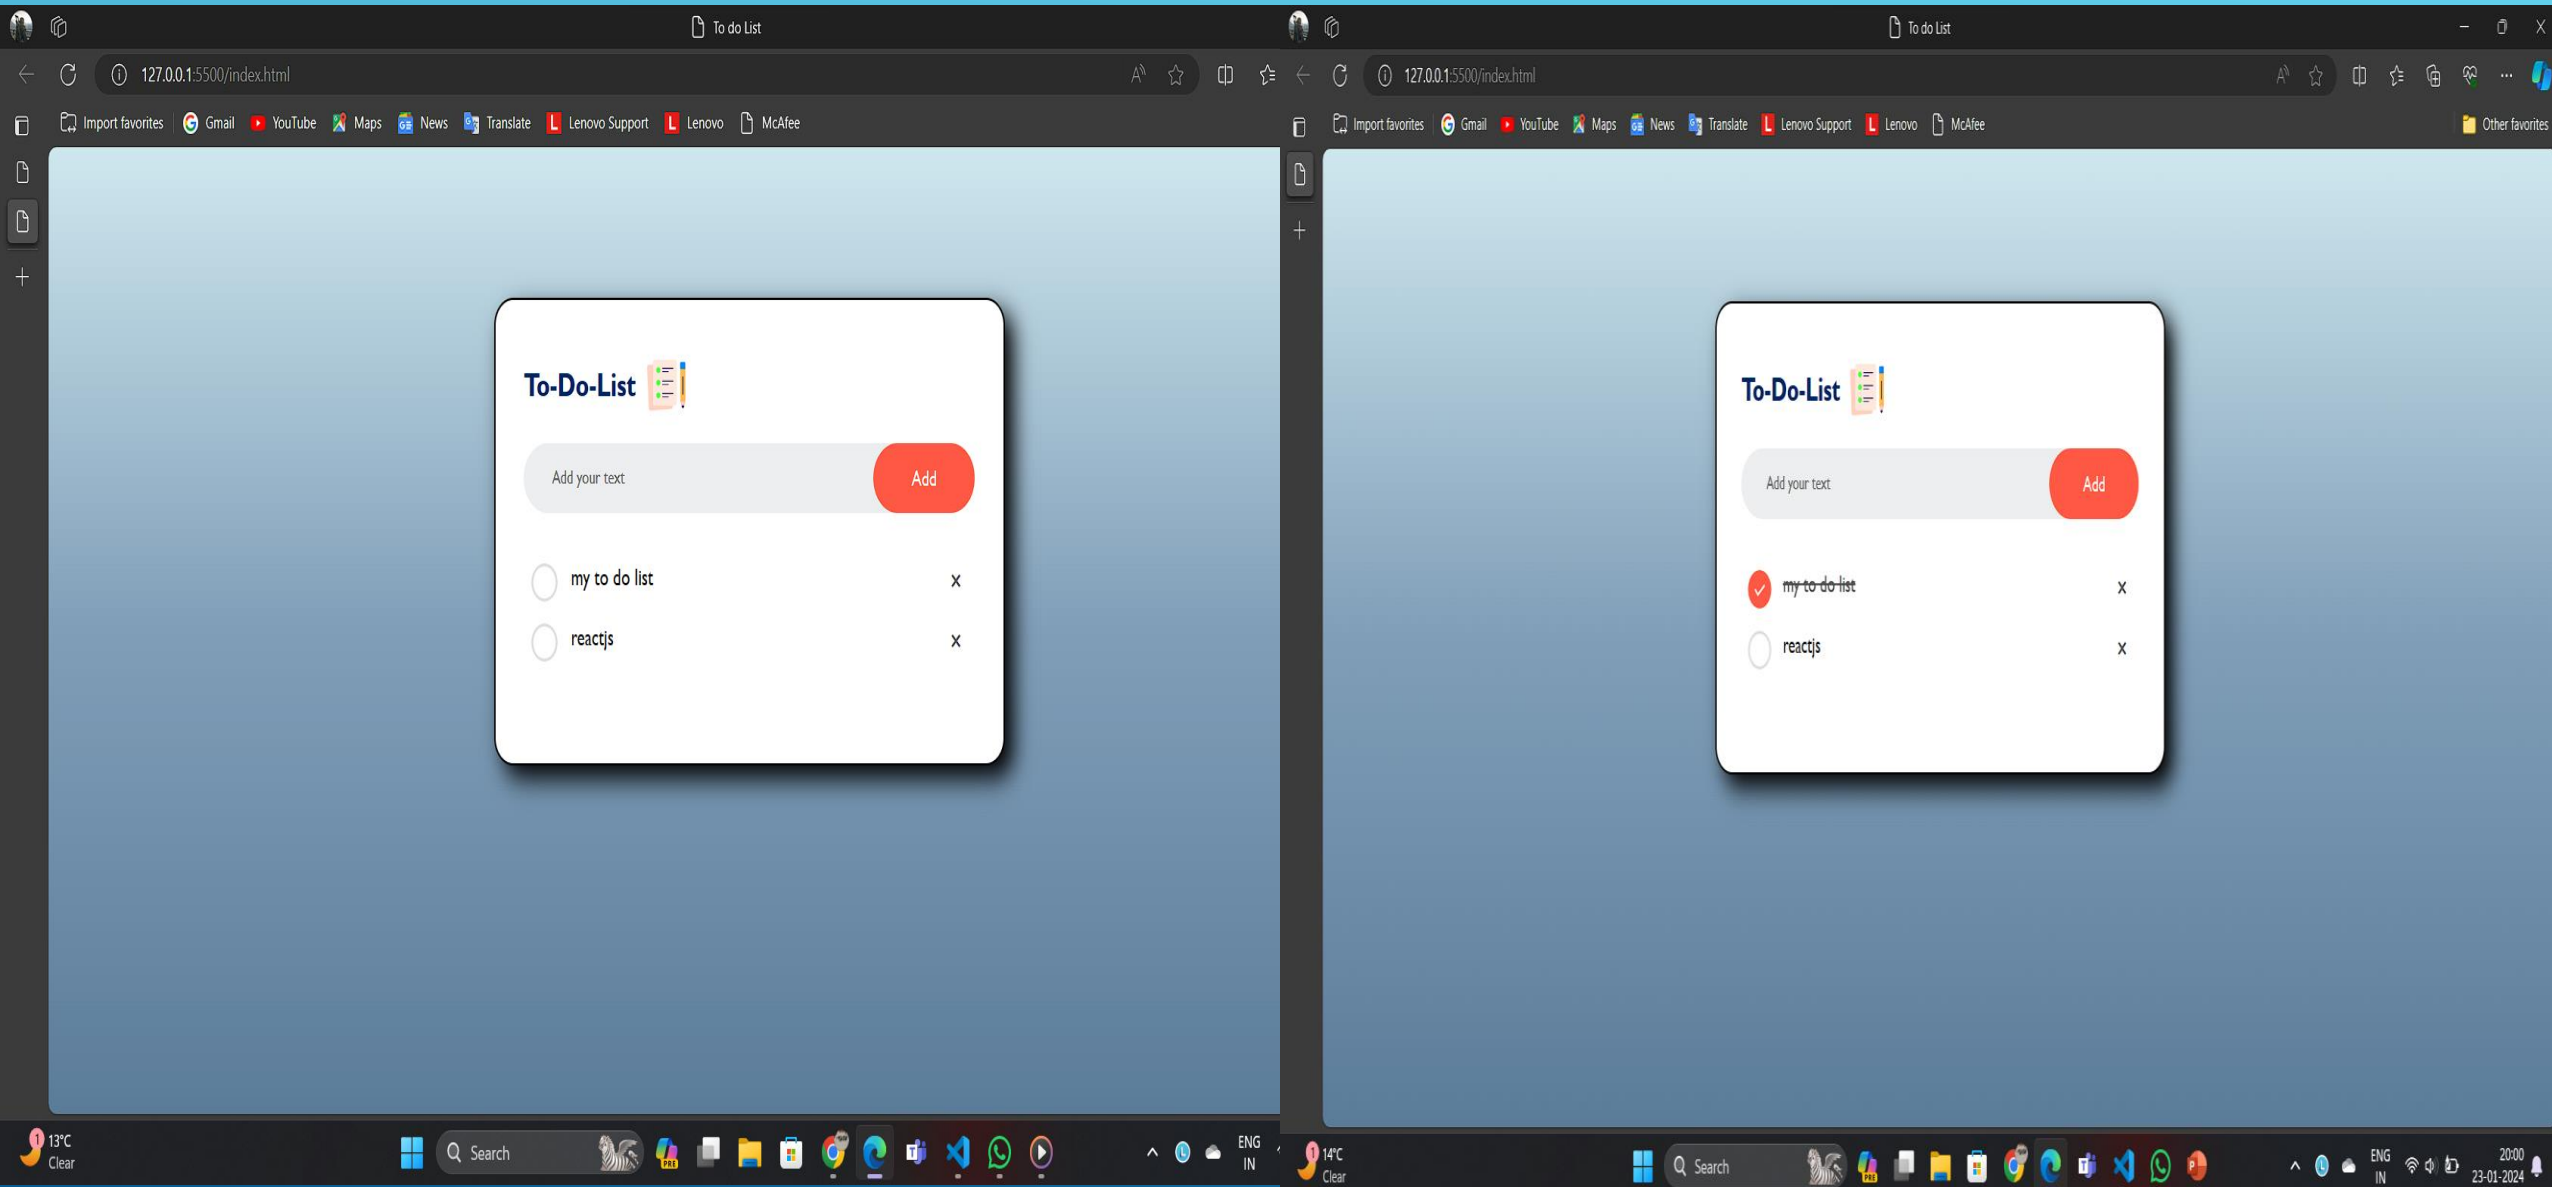

Identifier	Providers	Created	Signed In	User UID

Rows per page: 50 1 - 7 of 7

Now , the registered user's can login through valid credentials.

After logging in the user will be re-directed to the To-Do-List site.  
In this the user can make notes and make amendments in it.

# IN THIS TO DO LIST:

- ❑ It can be edited after completion .
  - ❑ User can update and delete tasks.
  - ❑ When task completed can be marked done.
- 
- Several white lines of varying lengths and orientations are positioned in the bottom right corner of the slide, creating a modern, abstract design element.
